in partial fulfilment for the course

21CSE354T - Full Stack Web Development

Department of Computing Technologies.

FACULTY OF ENGINEERING AND TECHNOLOGY

SCHOOL OF COMPUTING

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

KATTANKULATHUR

AUGUST 2024

ABSTRACT

The **SRM Exam Management System** is a comprehensive web-based platform designed to streamline and manage examination processes for educational institutions. The system facilitates secure and efficient handling of various exam-related tasks, catering to both students and faculty members.

For students, the system provides a dedicated portal where they can log in to view exam schedules, download hall tickets, check results, and access their profiles. Faculty members can log in through their own portal to manage exam-related data, including student grades and status for different subjects.

The system includes various features such as role-based login, tab-based navigation for accessing different modules, and the capability to download essential documents like hall tickets in PDF format. By integrating features like responsive design, clear user interface, and essential academic functionalities, the SRM Exam Management System aims to enhance the overall examination experience for all stakeholders, ensuring accuracy, transparency, and ease of use.

HTML tags

1. **<!DOCTYPE html>**: Declares the document type and version of HTML being used.
2. **<html>**: The root element that wraps the entire HTML document.
3. **<head>**: Contains meta-information about the document, including the title, character set, and links to external resources like CSS and JavaScript files.
4. **<meta>**: Defines metadata about the HTML document, such as character set and viewport settings.
5. **<title>**: Sets the title of the document, which is displayed in the browser's title bar or tab.
6. **<link>**: Links external resources like stylesheets to the document.
7. **<script>**: Includes or links external JavaScript files for client-side scripting.
8. **<body>**: The main content area of the HTML document, containing all the visible elements.
9. **<div>**: A generic container element used to group and style content.
10. ****: Embeds an image in the document.
11. **<h1>, <h2>**: Heading tags for different levels.

- 12.<**button**>: Represents a clickable button, which can be used to submit forms or trigger JavaScript functions.
- 13.<**form**>: Wraps form elements that allow user input and submission to the server.
- 14.<**input**>: Defines an input field where users can enter data, such as text, passwords, etc.
- 15.<**p**>: Defines a paragraph of text.
- 16.<**ul**>: Creates an unordered (bulleted) list.
- 17.<**li**>: Represents a list item inside a or list.
- 18.<**table**>: Represents tabular data, organized into rows and columns.
- 19.<**tr**>: Defines a row in a table.
- 20.<**th**>: Defines a header cell in a table, typically used for column headings.
- 21.<**td**>: Represents a data cell in a table.
- 22.<**span**>: A generic inline container used to group and style text or elements without disrupting the document flow.

CSS Styles and Elements

1. Body Styles:

- **Font Family:** Uses 'Segoe UI', Tahoma, Geneva, Verdana, sans-serif for a clean and modern appearance.
- **Background Colour:** Dark gray (#212121) for a sleek and contemporary look.
- **Text Colour:** White (#ffffff) for high contrast and readability.

2. Container:

- **Width:** Set to 80% of the viewport width with auto margins to center it.
- **Padding:** 20px to provide spacing inside the container.
- **Overflow:** Hidden to manage content that might extend beyond the container's boundaries.

3. Header:

- **Layout:** Uses flexbox to center-align items and arrange them in a column.

4. Logo:

- **Dimensions:** Width set to 100px with auto height to maintain aspect ratio.

5. Heading (h1):

- **Colour:** Light blue (#00bfff) for emphasis and visibility.
- **Text Alignment:** Centered to align with the header and page content.

6. Tabs:

- **Tab Links:**
 - **Background Colour:** Dark gray (#1e1e1e).
 - **Text Colour:** White (ffffff).

7. Tab Content:

- **Background Colour:** Dark gray (#1e1e1e).

8. Table:

- **Border Collapse:** Ensures borders between cells are merged.
- **Border:** 1px solid dark gray (#444444).

11. Login Box:

- **Background:** Dark gray (#1e1e1e) with rounded corners and shadow for depth.

13. Textbox (Input Fields):

- **Width:** 95% for full-width inputs.
- **Background:** Darker gray (#2a2a2a).

14. Button (btn):

- **Background Colour:** Light blue (#00bfff) with a hover effect changing to a darker blue (#1e90ff).
- **Text Colour:** Black (#000000).

15. Login Toggle Buttons:

- **Background Colour:** Dark gray (#1e1e1e) with hover effect changing to a lighter gray (#575757).

16. Logout Button:

- **Position:** Static at the bottom of the page.
- **Background Colour:** Orange (#ff4500) with a hover effect changing to a lighter orange (#ff6347).

17. Error Message:

- **Colour:** Red (#ff0000) for visibility.

18. List (ul):

- **List Style:** Disc for bullets.

19. Download Button:

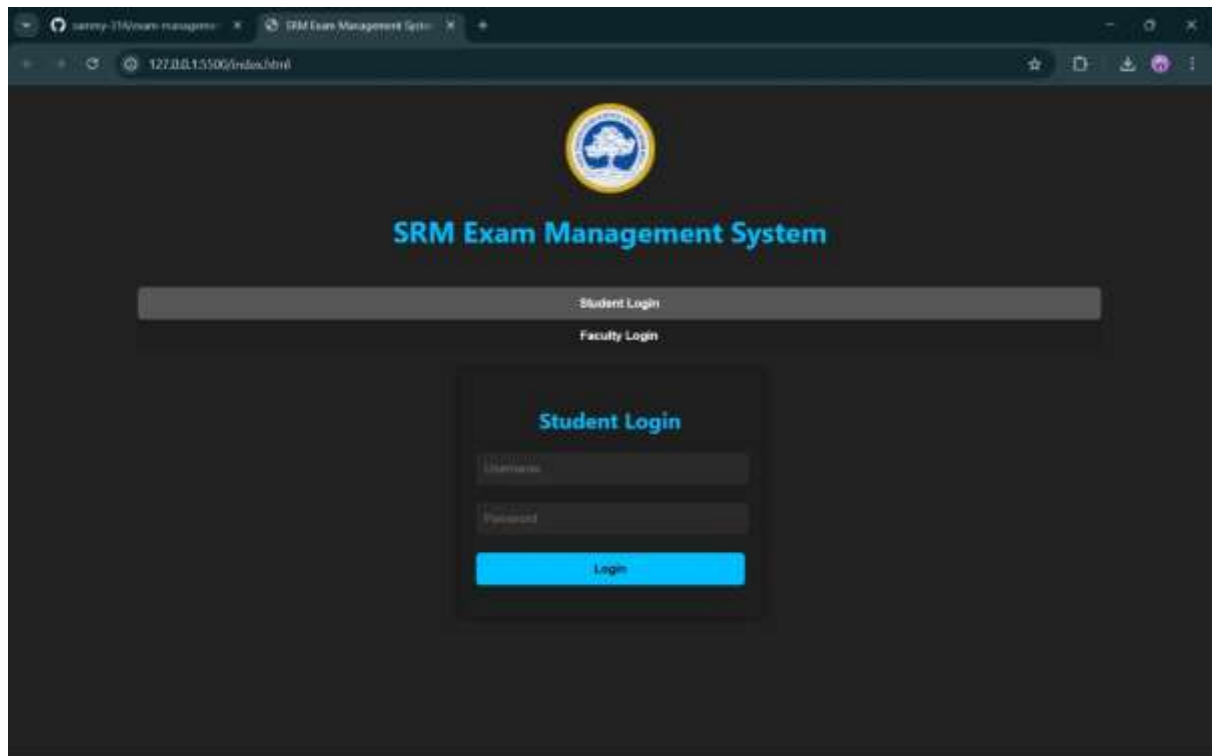

- **Background Colour:** Light blue (#00bfff) with hover effect changing to a darker blue (#1e90ff).
- **Text Colour:** White (#ffffff).

20. Faculty Page Specific Styles:

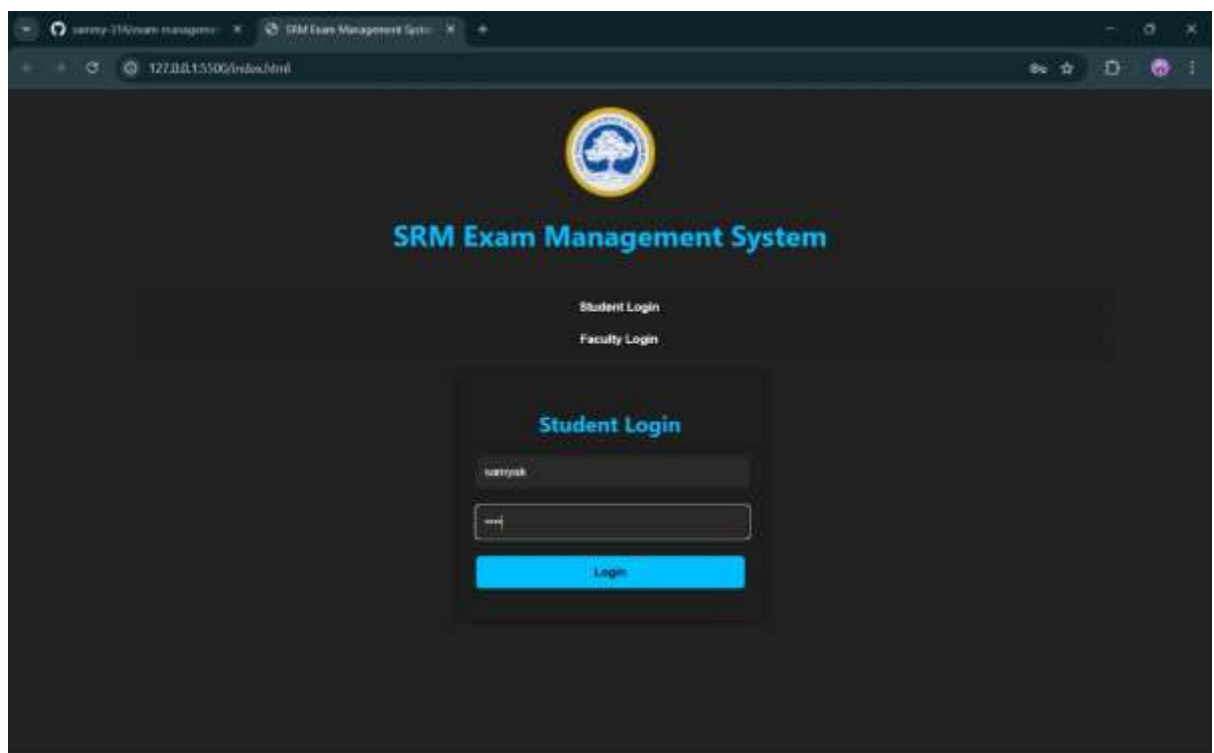

- **Tab Content:** Styled similarly to general tab content with a dark gray background and shadow.
- **Tab Links:** Same styling as general tabs.
